**IMATCH ACQUIRES CAPABILITYIT TO EXPAND PACIFIC NORTHWEST
TECHNOLOGY RECRUITING SERVICES**

*Enhanced team will provide customized recruiting solutions
to a growing Pacific Northwest clientele.*

SEATTLE, WA – iMatch, Seattle’s trusted solution to recruiting and staffing, today announced its acquisition of CapabilityIT to further serve the Pacific Northwest with high-quality recruiting solutions for the technology sector. The purchase was made in late 2016, and iMatch is now fully operational with an enhanced internal team to further identify needs and solutions, thanks to CapabilityIT’s aligned offerings and team.

The CapabilityIT purchase allows iMatch to rapidly grow its talented team and client base among larger competitors with an accomplished group of recruiters specializing in finding the right professionals for highly technical engineering, software development and project management positions.

“The Seattle-area remains in the top five U.S. markets for technology positions, making it a prime area for job growth but increasingly difficult for smaller staffing firms to remain competitive among a large company recruiting environment. iMatch’s acquisition of CapabilityIT allows us to remain committed to the Seattle market with our passion for servicing our growing client base with the strength of two companies of a stellar reputation for solving staffing challenges and providing excellent service,” said Dan Staggs, managing partner of iMatch Technical Services.
